Sustainable energy

Wikipedia

May 5th, 2018 - Sustainable energy is energy that is consumed at insignificant rates compared to its supply and with manageable collateral effects especially environmental effects. Another common definition of sustainable energy is an energy system that serves the needs of the present without compromising the ability of future generations to meet their needs.

Environmental Policy News

ScienceDaily

May 2nd, 2018 - Environmental Policy

Read policy recommendations from scientists and scientific organizations on many aspects of environmental policy. Background research available.
