The Routledge Companion to Business in Africa 2014-07-25 Sonny Nwankwo Although the world's poorest inhabited continent, Africa has recently shown signs of being a source of economic growth in the coming decades, with increased foreign investment - notably from China - and huge growth in GDP from a number of African states. In contrast to the heaving weight of books focusing on business opportunities in Asia, Eastern Europe and Latin America, Africa has been poorly served by academic publishing. This compendium of scholarship offers cutting-edge knowledge relating to business in Africa. The objectives of this collection include: To shed new light on the socio-cultural and historical underpinnings of business practice in Africa and their implications for promoting entrepreneurship and business behaviour in the region To consider the important constraints on business activities in Africa, and the emerging 'best practice' for redressing their real and potential impacts To facilitate a better understanding of contemporary business practice in Africa

through the application of relevant theories and models, including emergent ones. The Routledge Companion to Business in Africa is a comprehensive reference resource that provides the perfect platform for embarking on research and study into Africa from the business perspective.

The Palgrave Handbook of Contemporary Gothic 2020-07-10 Clive Bloom "Simply put, there is absolutely nothing on the market with the range of ambition of this strikingly eclectic collection of essays. Not only is it impossible to imagine a more comprehensive view of the subject, most readers - even specialists in the subject - will find that there are elements of the Gothic genre here of which they were previously unaware." - Barry Forshaw, Author of British Gothic Cinema and Sex and Film The Palgrave Handbook

of Contemporary Gothic is the most comprehensive compendium of analytic essays on the modern Gothic now available, covering the vast and highly significant period from 1918 to 2019. The Gothic sensibility, over 200 years old, embraces its dark past whilst anticipating the future. From demons and monsters to post-apocalyptic fears and ecological fantasies, Gothic is thriving as never before in the arts and in popular culture. This volume is made up of 62 comprehensive chapters with notes and extended bibliographies contributed by scholars from around the world. The chapters are written not only for those engaged in academic research but also to be accessible to students and dedicated followers of the genre. Each chapter is packed with analysis of the Gothic in both theory and practice, as the genre has mutated and spread over the last hundred years. Starting in 1918 with the impact of film on the genre's development, and moving through its many and varied international incarnations, each chapter chronicles the history of the gothic milieu from the movies to gaming platforms and internet memes, television and theatre. The volume also looks at how Gothic intersects with fashion, music and popular culture: a multi-layered, multi-ethnic, even a transgendered experience as we move into the twenty first century.

Necropolis 2013 Anthony Horowitz Evil has been unleashed on the world and only five children - with special powers - can save it. Matt and the others desperately need to find Scarlett, the final gatekeeper, who has been trapped in Hong Kong, where puddles of water turn into puddles of blood, where ghosts, demons and hideous creatures stalk the streets.

The Eye of War 2018-10-09 Antoine Bousquet How perceptual technologies have shaped the history of war from the Renaissance to the present From ubiquitous surveillance to drone strikes that put "warheads onto foreheads," we live in a world of globalized, individualized targeting. Antoine Bousquet provides both a sweeping historical overview of military perception technologies and a disquieting lens on a world that is, increasingly, one in which anything or anyone that can be perceived can be destroyed—in which to see is to destroy. Arguing that modern-day global targeting is dissolving the conventionally bounded spaces of armed conflict, Bousquet shows that over several centuries, a logistical order of militarized perception has come into ascendancy, bringing perception and annihilation into ever-closer alignment. The efforts deployed to evade this deadly visibility have correspondingly intensified, yielding practices of radical concealment that presage a wholesale disappearance of the customary space of the battlefield. Beginning with the Renaissance's fateful discovery of linear perspective, *The Eye of War* discloses the entanglement of the sciences and techniques of perception, representation, and localization in the modern era amid the perpetual quest for military superiority. In a survey that ranges from the telescope, aerial photograph, and gridded map to radar, digital imaging, and the geographic information system, Bousquet shows how successive technological systems have profoundly shaped the history of warfare and the experience of soldiering. A work of grand historical sweep and remarkable analytical power, *The Eye of War* explores the implications of militarized perception for the character of war in the twenty-first century and the place of human subjects within its increasingly technical armature.

BUDDHA & HIS DHAMMA 2023-01-01 B R Ambedkar Ambedkar was the first Indian to pursue a doctorate in economics abroad.[71] He argued that industrialisation and agricultural growth could enhance the Indian economy.[72] He stressed investment in agriculture as the primary industry of India.[citation needed] Ambedkar advocated national economic and social development, stressing education, public hygiene, community health, residential facilities as the basic amenities.[72] His DSc thesis, The problem of the Rupee: Its Origin and Solution (1923) examines the causes for the Rupee's fall in value. In this dissertation, he argued in favour of a gold standard in modified form, and was opposed to the gold-exchange standard favoured by Keynes in his treatise Indian Currency and Finance (1909), claiming it was less stable. He favoured the stoppage of all further coinage of the rupee and the minting of a gold coin, which he believed would fix currency rates and prices.[73] He also

analysed revenue in his PhD dissertation *The Evolution of Provincial Finance in British India*. In this work, he analysed the various systems used by the British colonial government to manage finances in India.[73][74] His views on finance were that governments should ensure their expenditures have "faithfulness, wisdom and economy." "Faithfulness" meaning governments should use money as nearly as possible to the original intentions of spending the money in the first place. "Wisdom" meaning it should be used as well as possible for the public good, and "economy" meaning the funds should be used so that the maximum value can be extracted from them
