Color Atlas of Gonioscopy 2008 Wallace L. M. Alward "Color Atlas of Gonioscopy, by Wallace L.M. Alward, MD, and Reid A. Longmuir, MD, is a brief, but comprehensive, introduction to gonioscopy. Gonioscopy is a visual science, so the greater part of the book is devoted to illustrations of gonioscopic and slit-lamp findings, normal and abnormal. The inspiration for this book came out of a remarkable collection of water-color paintings of the angle created by Lee Allen in the late 1940s and early 1950s. The paintings show the angle with unique clarity. Mr. Allen's paintings have been used to illustrate points whenever possible and have used photographs when no paintings were available."--Site web de l'éditeur.
